

Humanitix and Wattpad have integrated the Canva Button to help their customers create amazing designs.

Canva has partnered with the Australian, not-for-profit ticketing platform, Humanitix which has integrated the Canva button to make adding event graphics easy.

The Canva Button is a simple API that enables online platforms to give their users design superpowers.

Humanitix event hosts can now design event banners without having to leave the platform. 100% of profits from Humanitix goes to education initiatives affecting disadvantaged children in Australia and overseas.

”

This partnership means better events, more tickets sold, and more booking fees for our education projects. It's all about running events with impact.

”

At Wattpad, our vision is to entertain and connect the world through stories. We've built the world's leading social storytelling platform by supporting writers at every stage of their journey. Before a reader meets a story's first sentence they encounter a cover. And we know that a compelling cover can help make a story unmissable. We're thrilled to integrate the Canva Button directly on Wattpad, helping stories stand out and making the cover-creation process even easier for our writers.”

Dani Zacarias, Head of Content and Creator Relations, Wattpad, said,
